

Please post this information at your next EAA meeting.

Want to get out of the garage and get flying. I may have a solution for you. I presently have a flying RV6, 1200 hrs total time. I'm planning to use the engine, prop, and panel for another project, so I will be willing to sell the rest of the aircraft. You could be flying in weeks and not years, and you could also come for a demo ride now in the airplane before I start to dismantle it.

For more information me at 908.722.2778 (New Jersey). Armond Turiello
